

Aconex and Grazer join forces for an Operations & Maintenance (O&M) Solution

At project end you need everything neatly in place and completed as per specification. **As a contractor**, you must move onto the next project, and **as a client**, you've got to start running the asset without a hitch. But all too often, things don't go to plan. **The risk? Extra delays and added cost.**

Creating complete, high quality O&M Manuals is onerous and frustrating; and paper copies in ring binders are just not the way to manage information in today's world. Can you track if everything has been submitted and reviewed? Who needs to be chased? How and when can you deliver? Can the *what* be found *when* it's needed?

Now, there's a solution to the handover of O&M Manuals. One that gives you the **control, efficiency** and **quality** you need. In partnership with Grazer, a leading provider of digital asset knowledge management solutions, Aconex offers an **end-to-end solution** that integrates the entire process and delivers **high quality, graphically referenced digital O&M Manuals.**

Now, "project handover" no longer means "project hangover".

Recognize these challenges?

- › Frantic activity at project end, pursuing handover information months, sometimes years, after service delivery?
- › Manual processes slowing down document approvals and sign off?
- › Inability to find critical information when you need it?
- › High printing costs and storage issues?

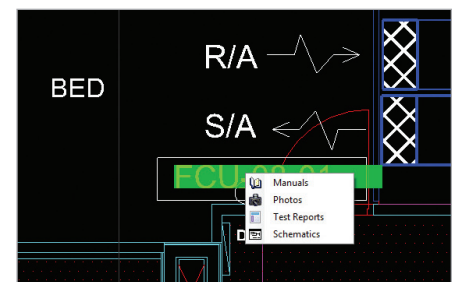

Aconex and Grazer will take the headache out of O&M Manuals.

A smooth and paperless transition

Running on the Aconex platform, the solution sees the alignment of information technologies in construction and asset management. Information flows from the very beginning of the project right into facility management. With O&M Manuals in electronic format, all data is:

- › captured from the start
- › stored safely
- › reviewed efficiently
- › retrieved instantly
- › delivered digitally or in print.

Maps and drawings can simply be clicked on for the quick retrieval of manuals information

Improved visibility, quality and control

By incorporating the O&M Manuals solution into your project, handover preparation is taken care of in a methodical and logical way.

- › **CONTRACTORS** avoid the time-consuming, inefficient and costly manual process of collating, reviewing, compiling and preparing all O&M manuals.
- › **PROJECT OWNERS** and Facility Managers are assured of high quality manuals populated with easily retrievable information.

All online: Capture. Review. Deliver.

INFORMATION CAPTURE

Start collating O&M documentation right from the beginning of the project. Handover information will be captured on the Aconex platform, securely and efficiently.

Track and report on the progress of each manual via easy, graphical reporting.

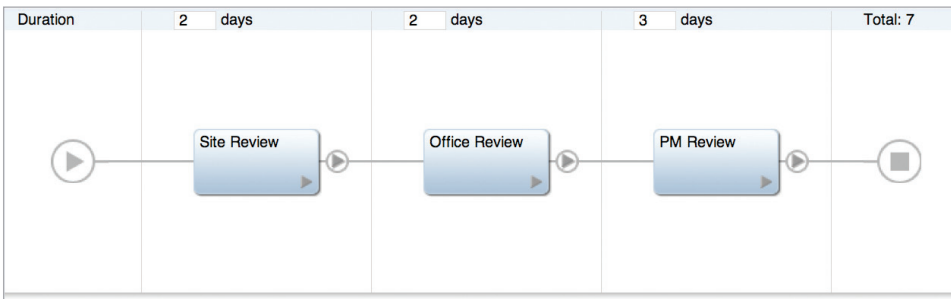

The graphical package display summarizes the progress of documents in each manual

DOCUMENT REVIEW

Use the Aconex Workflows to manage the review and approval process, saving time and putting you in control.

Complete visibility of progress so you'll be able to spot bottlenecks early and take action.

You can manage the review and approval process with Workflows

MANUALS DELIVERED

The seamless transition of all O&M data (including metadata) from Aconex to Grazer's digital manuals ensures information is complete, securely stored and easily accessible. Printed manuals can also be created.

The visual navigation makes finding manuals information a matter of clicking on the required asset on the map or as-built drawing. **Grazer's C-Manuals Solution reduces both printing costs and the time spent finding information.**

Aconex and Grazer – a natural fit

Connecting the information flow between construction and asset management was the missing piece until now. This partnership offers a solution to change the way you view the handover process, and the management of your O&M Manuals information.

About Grazer

Grazer Pty Ltd has been at the forefront of digital asset knowledge management for over ten years. Based in Adelaide, South Australia, they have provided products and services to some of Australia's largest organizations since 2003.
